

NEW PROMOTION

ADD A GARAGE FOR 20% OFF (*)!

NEVER BEFORE HAS CALIF. PRE-CUT HOMES OFFERED THIS LEVEL OF DISCOUNTING!

Log on to caprecut.com to earn these great savings

For the next 45 days following the home show if you buy a house that has no garage we will offer a added one car garage for **20% OFF** or a two car 24' x 24' detached garage for **20% OFF (*)!** As a point of reference, the normal promotional discount that we offer is usually much less, so this **20% is an exceptional discount.**

If the package is a standard package of less than 1500 square foot of living space and already has a 2-car garage and you want a three-car garage, same offer. If the house is over 1500 square foot, we will offer a stand-alone garage of 24' x 24' for again **20% OFF (*)!**

Likewise if the house is whatever size over the 1500 square foot and you want a third or fourth car garage attached to the house the added fees are **20% OFF (*)!**

This is a great offer for those of you who are maybe downsizing from a large home to have the added storage space you never had before. You will surprise yourself with the fees the local storage facility will charge you on a monthly base. That is a lot of money when added up at the end of a year, after two or three years, at a local storage facility.

No one has enough storage space in their home. The most inexpensive way to add more storage to your house would be to add more garage space or add a detached storage/garage building from CPH. Keep in mind there are many options that buyer like to add on to our garages, the price can change over our standard garage packages.

Here are some examples: build the garage with taller walls than the normally 8' in height. We can very easily increase the wall heights to 10'. Vaulted ceilings, higher pitch roofs, larger or more windows & doors, different siding choices, and different rooflines. These are just a few of the popular options our clients are requesting for.

(*) If the additional garage size changes then the freight also could charge. There could be some very small additional fees. Such as added drafting & engineering fees for the required changes.
